25X1

25X1 The following table

25X1 [redacted] lists, the types and amount of fuel sent during August

1952 to various depots in the DDR for the use of the Soviet Army. All figures are given in metric tons.\*

Depot	Mittelbenzin I	Mittelbenzin II	Solvents
Velten	255.1	83.0	322.1
Magdeburg (Aken) **			34.1
Dresden	455.1		45.3
Münchenbernsdorf			19.1

25X1 \* [redacted] Comment: These figures do not appear in any plan report issued in the DDR. A record of the issue is kept only at the plant itself and probably at Potsdam. The order for the amount to be sent to each depot comes directly from Potsdam to the Russian director at the plant, who passes it on.)

25X1 \*\* [redacted] Comment: While this depot is referred to as "Magdeburg", the depot is really at Aken, not far from the city of Magdeburg).
